

## Custom Electronic Manufacturing

Do you need a reliable partner for your PCB(A) and electro-mechanical assemblies? Look no further. DigitTron Technologies has over 25 years of experience helping customers from our state of the art facility located in Shawnee, Kansas, with their electronic assembly needs. Providing innovative solutions specifically designed for low to medium volume requirements.

DigitTron Technologies partners with you, assisting and guiding you through the entire process from concept to volume manufacturing with single point accountability for your project. This means greater convenience, value and velocity for your project.

DigitTron Technologies is committed to your satisfaction and success. Our facility is ISO 9001:2008 certified and all of our electronic assemblies meet or exceed the requirements of IPC-A-610E for class I, II, and III devices and J-STD-001 to give you confidence of product reliability. Many of our products comply with UL and CSA requirements.

### Service

DigitTron provides convenience and value with single point accountability.

*Product Development. Engineering. Manufacturing.*

DigitTron Technologies has joined the Pivot International group, even further expanding its capability to offer world class product design, development, and manufacturing to our clients.

### **Pivot International**

Pivot International was founded in Kansas City in 1972 starting as a product design and development company. Since that time it has grown to a worldwide organization with offices and facilities in London, in Taiwan, the Philippines, and China. Pivot has established itself as a leader in product design, development and manufacturing to companies around the world. From ideation thru creation, Pivot leads the way with complete suite of engineering services. We take care of all your product needs allowing you to focus on the other aspects of your business.

### **Pivot offers:**

- Engineering services that include: electrical, mechanical, software, and industrial design
- Corporate wide ISO 9001:2008, and ISO 13485:2003 certification
- FDA registered manufacturing
- Supply chain management
- Regulatory compliance such as UL, IEC, CE, CSA, FCC, RoHS, and TUV

### **Pivot specializes in:**

- Touch screen technologies
- Security and Biometrics
- Wearables and Fitness
- Medical Devices
- Consumer Goods
- Prototypes
- PCB design, layout and manufacturing
- RFID
- Contract Manufacturing
